

He who controls the money supply of a nation controls the nation.

___ James Garfield, 20th President

Mar. 4th, 1881, assassinated Sept 19th, 1881

Dear Sir/madam,

This communication is a formal expression of my will that you vote NO to the Federal Government granting power to the Federal Reserve to institute Retail CBDC to the citizens. Totalitarian, Social and Communist governments are working to quickly implement Retail CBDC to their citizens and are in most cases compellingly them to comply. Under the US Constitution, Retail CBDC violates Amendments 1 and 14. It has the potential to demolish Amendments 1, 4, 6, 7, 8, 10, 12, 15 and 16. In other words, I'm aware that the Constitution will be demolished and therefore abolished.

It is essential that free enterprise and entrepreneurship be encouraged, supported and protected. Competition in business has always been supported and monopolies prevented for good reasons. Because it will be the Federal Government monopolizing the control of our finances does not make it better. In fact, it's a system that will allow abuse. The technology exists for Retail CBDC to be implemented, but that does not mean that it should be used for nefarious purposes.

Our descendants' lives should not play like a bad movie entitled, "Before CBDC, After CBDC". It would be a shame on our generation and your leadership. You were elected to protect the Constitution and the interest of the United States citizens, also to improve the education of our youth so that our country could become stronger. When serious financial issues arise, we should be wise enough to formulate solutions unique for our Democratic Nation. We should not follow other nations automatically who have little liking for our Democracy. Contrary to popular belief, this experiment is far from over.

I'm putting you on notice that your vote in this matter decides your future reelection.

Sincerely and Respectfully

X _____
